He selected as delegate of HPAIR Asia Conference 2021 & 2023, Indonesia Delegate for ASEAN-China Young Leaders' Summit by ASEAN Foundation & Peking University, selected Official Delegate for Bali Democracy Student Conference IV of the Ministry of Foreign Affairs of the Republic of Indonesia attended 250 students from 58 countries, and semi-finalist in social project Harvard MUN 2021 and 2023. He is Awardee, Full Scholarship (Kartu Indonesia Pintar).

Aldiron Jhony Tahalele

Jakarta, DKI Jakarta, Indonesia

Desired program: MA in International Relations

Aldiron J. Tahalele hails from Ambon, an isolated island in eastern Indonesia. He saw firsthand the impact of social-religious conflict on Moluccan society, causing his once-beautiful hometown to deteriorate. Nevertheless, he remained resilient and determined to make a positive difference in his community. He pursued International Relations as his undergraduate degree at UKSW and became aware of the growing radicalism and conservatism in Indonesia. This awareness led him to focus on the critical issue of terrorism, which he believes is connected to non-traditional security like poverty, culture, and democracy. From 2019 to 2021, he managed the #MenjadiMaluku project, where he organized the project's objectives and budget, worked with local schools, and used social networking to raise funds to help earthquake refugees in Maluku.

Anisya Dewi Kusmardianto
Bogor, Jawa Barat, Indonesia

Desired program: MS in Project Management, MS in Integrated Marketing

Anisya (23) is a business management graduate from Trisakti University, majoring in marketing. She is a calm and persistent person that is eager to learn and passionate in project management, marketing and content/media creation. She is currently responsible as Fatihunnur Foundation's project manager and developing her own startup as the external relation director in Sakubi Teknologi Indonesia. She has experience in handling community empowerment project related with digital literacy, youth empowerment, education empowerment and skill empowerment in the society. She also excel in several competition such as business pitching and debating competition. . During her days pursuing her associate degree in Universitas Indonesia, she actively involved in business pitching competition and receive some grants to develop her startup. She is actively involved in some youth organization related with debating, community empowerment and cultural and language empowerment.

Ardi Hermanto
Bekasi, Jawa Barat, Indonesia

Desired program: MS in Electrical Engineering

Ardi Hermanto is currently working at ICT company Tower Bersama Group as a Technology Solution Engineer. He holds a Bachelor's degree in Electrical Engineering with a concentration in Control Engineering from the National Institute of Science & Technology Jakarta. Ardi is very interested in the engineering area, especially renewable energy and artificial intelligence. By joining this course, I hope to get an overview of the learning system on US campuses and train my critical thinking system when discussing and digital literacy skills.

Azzahra Rahmani Ali
Bekasi, Jawa Barat, Indonesia

Desired program: MBA

"Azzahra has a deep understanding in MSME in Indonesia and is currently working as Strategic Partnership Senior Lead in Tokopedia. She held a bachelor degree from Institut Teknologi Bandung in 2015 majoring in Materials Engineering. Straight out of university, she directly shift her career to business development by joining Bank Mandiri for 3.5 year specializing in MSME Financing then, in 2019 she decided to move to Tokopedia. She then exploring more MSME in digital ecosystem.

She's an extrovert who always thrilled by new challenges, a learner who is really excited to discuss an idea and really looking forward to her participation during USINDO GRASP sessions."

Deri Dino Lawrentus
Jakarta Timur, DKI Jakarta, Indonesia

Desired program: MBA

Deri Dino Lawrentus currently working in BNI Ventures, which is Venture Capital under Bank Negara Indonesia that established at 2022 as a Finance Senior Associate. Before that, he has pursued his career at BNI for a decade. He held a Bachelor's degree in Accounting form Airlangga University at Surabaya. He really excited with USINDO Grasp course because his friend named Cory already joined for batch 1 and she said she gained her writing skill and had a lot of fun during the event!

Dovan Pujangga A Lanank Es
Jakarta Timur, DKI Jakarta, Indonesia

Desired program: MA in Energy and Resources

"Dovan Pujangga A Lanank Es is an energy and mineral resources policy analyst at the National Research and Innovation Agency (BRIN). He aims to contribute to climate change mitigation by identifying bottlenecks and solutions in energy economics.

Despite his engineering degree, his keen interest in economic development and the energy sector has prompted him to pursue a master's in Energy Resource Economics. He is eager to contribute to Indonesia's policy-making to reduce national emissions."

Evelyn Clarissa Febiany
Bekasi, Jawa Barat, Indonesia

Desired program: MA in Learning Design Innovation and Technology

Evelyn is pharmacist graduating from Faculty of Pharmacy, Universitas Airlangga, Surabaya. After graduation, she joined on the job training called Zenius Educators Development Program, pioneer of edu-tech in Indonesia. At the same time she made online course called Pharaway Education with one of her friend to help pharmacy students preparing for their competence exam. After On the job training for 3 months, she worked as Learning Experience Designer and after that she worked as Learning and Business Development in an early-stage start-up company. Now, she is applying for LPDP Scholarship to pursue her interest in Learning Design Innovation and Technology in Harvard as her first option. Learning Design and Technology in Stanford as second option, Learning Science and Technology in UPenn as third option. She also eager to upgrade her critical thinking and digital literacy skills by joining USINDO mini intensive course

Fabio Almer Agoes

South Tangerang, Banten, Indonesia

Desired program: MA in Climate & Society

Fabio is a fresh graduate mechanical engineering student who is eager to learn about the environment. Fabio was the first awardee of the IISMA program to study at KU Leuven, part of Nestle international internship program, and associate consultant at EY.

Farah Nida Pahlawan

South Jakarta, DKI Jakarta, Indonesia

Desired program: LLM in Technology Law, LLM in Business Law, LLM in Commercial Law, General LLM

Farah Nida Pahlawan works at Durianpay, a Fintech payment platform and aggregator in Indonesia as their Legal and Compliance Associate and previously worked at Ginting & Reksodiputro in association with Allen & Overy as their Graduate Legal Intern. She held a Bachelor's degree in Law from Parahyangan Catholic University. She is very excited to join this mini-intensive program as she believes that it will enhance her writing skills, communication skills, and other soft skills. She is also excited to meet like-minded people from diverse backgrounds. This is a great opportunity to learn from others' experiences and forge new connections that could be valuable in your personal or professional life. She believe that this course will be a valuable journey to help her obtain her higher education in the USA.

Farhan Muhammad Prakasa
Bandung, Jawa Barat, Indonesia

Desired program: MS in Mechanical Engineering

Farhan Muhammad Prakasa is a final year mechanical engineering student in Bandung Institute of Technology. His interest in automotive industry drove him to choose mechanical engineering as his college major. He is passionate about renewable energy, especially its implementation in Indonesia. Currently, he is working on his final thesis which mainly discusses about geothermal power plant with low temperature geothermal sources. In the future, he aspires to become an expert in renewable energy and energy conversion processes which contribute to the development of clean energy in Indonesia. Farhan enjoys reading books and watching movies in his free time. Farhan is excited to meet experts that will help him to gain knowledge in crafting an excellent application essay. He is also delighted to participate in a community which puts attention in higher education, especially in the United States.

Flora Tresia Wehelmina Kambuaya
Depok, West Java, Indonesia

Desired program: Ph.D in Public Policy or Ph.D in Finance Management

Flora Kambuaya is a civil servant in the local government of West Papua Province. She has been working since 2015 in Infrastructure and Development regional division at subnational level agency (BAPPEDA West Papua). She like works with team and build networking by joining social movement. She already established her own community that focus on literate of education and medicine that helping the children and women in in Sub Urban Area in Manokwari. As one of the best accession that she got that as LPDP Awardee in 2019, and currently, she's master in the University of Indonesia, at Infrastructure Management Program. She expectation that through this program that it can help her to shape her English ability as well as build she confidence to apply in the U.S state for the Ph.D. She hope that she can gain new experience as the best milestone for her, to plan the next journey and it also can be beneficial for her community as sharing experience.

Hanifah Mahdiyyah

Manokwari, West Papua, Indonesia

Desired program: M.Arch in Architecture / MSD-EBD in Environmental Building Design

Hanifah Mahdiyyah is an architecture graduate with a bachelor's degree from Gadjah Mada University. From 2021 until today, she started her career as a civil servant at Public Works and Spatial Planning Department in Manokwari Regency. As someone who studied design, her interest lies in improving the built environment with a sustainable approach—part of her dream to make a better world. She also has a long-lasting goal to travel the world and contribute more to society.

Becoming a part of this course would give her insight into what to await if she enrolled in real graduate school. Learning new things and meeting like-minded people with the same interests have always been fascinating, especially if that leads her to achieve her dream of studying abroad.

She believed that the best learning materials come from experiences. Therefore, being taught and evaluated by the experts could be an invaluable and exciting life experience for her journey in the future.

Hanna Angelina

Tangerang, Banten, Indonesia

Desired program: M.Ed in Education (Teaching and Teacher Leadership)

E-mail: hannaangelinaa@gmail.com

Hanna Angelina is a science teacher with a strong passion for education. She graduated with a degree in chemistry education and has been working as a science teacher at a private school for a year. Throughout her career, Hanna has been dedicated to helping her students develop a love for science and a strong understanding of the subject.

Hanna is particularly excited about the USINDO GRASP program, which is designed to prepare students for master's programs in the US. She is eager to learn more about education and pursue a master's in education at US university. She is looking forward to connect with other students and professionals who share her passion for education.

Overall, Hanna is driven by a desire to make positive impact in the world through education. She believes that by promoting a love of learning and fostering critical thinking skills, she can help to create a generation of thoughtful and engaged global citizens.

I Gusti Ayu Inten Wulandari

Tangerang Selatan, Banten, Indonesia

Desired program: MS in Biochemistry, MS in Molecular Biology

Inten holds a bachelor's degree in biochemistry and is currently a research assistant studying infectious diseases. She intends to continue her studies in the field by pursuing a master's degree program in biochemistry/ molecular biology focusing on pathogenesis research. She is interested in understanding the cause and development of disease at the molecular level and hopes to apply her knowledge and skills in providing better clinical interventions. Inten is excited to participate in the Critical Thinking and Digital Literacy Course as she believes the course can increase her prospect for admission to graduate schools.

I Putu Harum Semadi

Central Jakarta, DKI Jakarta, Indonesia

Desired program: MS in Computational Analysis and Public Policy (MSCAPP)

"I Putu Harum Semadi is a Civil Servant at the Inspectorate General of the Ministry of Home Affairs the Republic of Indonesia. He holds a Bachelor's degree in Governance Science (S.IP) from Institute of Home Affairs Governance in the field of Development Management. After graduating, He received the Kartika Pradnya Utama VIII Award as the top 10 best undergraduate student.

His passion for data science and public policy stems from his belief that data-driven decision-making can lead to better policy outcomes and ultimately improve the lives of citizens, transforming public services and making them adaptive to respond to the challenges and changes in the era of disruption through monitoring and evaluation.

He believes the USINDO GRASP will provide him with critical thinking and digital literacy in academic writing and graduate school applications. These areas will be critical for his success in pursuing graduate studies.

Muhammad Aulia Rahman
Yogyakarta, Indonesia

Desired program: Ph.D in Mechanical Engineering

Muhammad Aulia Rahman is a lecturer at the Department of Mechanical and Industrial Engineering in Universitas Gadjah Mada. He finished his bachelor's degree in mechanical engineering from that university in 2019 before completing his master's degree in the same field at Imperial College London two years later. Currently, he is dedicating his time to do research in renewable energy, to be more specific on the utilization of nanoscale heat transfer for hydrogen production. In addition to his research interest, he has also been serving as an energy expert advisor for several ministries, especially in regard to making a regulation draft on energy policies.

Muhammad Faisal Anshory
Bogor, Jawa Barat, Indonesia

Desired program: MS in Geospatial Technologies, MS in Applied Urban Science and Informatics, Master of Urban Spatial Analytics (MUSA)

Muhammad Faisal Anshory is a Geodesy Engineering graduate from Institut Teknologi Bandung. His interests lie in spatial data science and analysis. Currently, he is working as a Data Analyst at the WageIndicator Foundation, where he performs data analysis related to a survey on living wages and workers' rights fulfillment in garment factories in Indonesia. Faisal has experience as a Disaster Monitoring and Analysis Intern at the AHA Centre. He monitored the daily development of natural disasters in ASEAN and assisted in developing reports related to natural disasters. During his free time, Faisal indulges in his hobbies of gaming and calisthenics. He is particularly interested in combining his data, geospatial, and urban science knowledge, and plans to pursue a master's education. He is excited about the USINDO GRASP Mini Intensive Course because he believes it will help him master essential skills for his U.S Graduate School application in the future.

Nizar Eko Fachrulloh

Makassar, South Sulawesi, Indonesia

Desired program: MS in Data Science

Nizar is currently working at FHI 360 Indonesia as a Monitoring Evaluation and Reporting Coordinator in USAID MADANI project. He held a Bachelor's degree in Business Administration from Universitas Brawijaya. He had more than 4 years job experiences before he working on USAID MADANI project. Previously, his career mostly on community development and research. Because he really loves data, he decides to choose Data Analytics as major in master program. Therefore, he is eager to join this course because he believes this course is beneficial for pursuing master degree.

Nuzulul Laili

Malang, Jawa Timur, Indonesia

Desired program: MS in Public Health

Nuzulul Laili, usually called Lely. She was born and raised on Salt Island named Madura Island. Currently just finished her education at the University of Muhammadiyah Malang. Now she is a medical doctor. She will start her general practitioner internship program in August 2023. She was very happy to be a doctor because it's her my dream since childhood. She is a cheerful, optimistic, humorous doctor who likes new challenges. She loves to meet new people and easily mingle in new environments. Participating in social activities like volunteering is one of her hobbies. So, she is very excited to take this course because she will get a lot of new insights about studying in the US and meet many new friends who also have the same dream as me.

Prihantini

Sleman, Yogyakarta, Indonesia

Desired program: Ph.D in Mathematics

Prihantini, an alumna of Bandung Institute of Technology in master of mathematics program. Currently, she is working on Metamorf as a researcher and doing several projects related with their topic both in her occupation or in Indonesian Research Institutes. She intend to pursue her doctoral program and now she is going to prepare it. She formed a community, 'Orbit Paper' in 2018. Then, she also initiates new community 'Youth Passion to Action', which is community that help and share about our passion to people and help people to contribute to other via their passions, through seminar, webinar, discussion, contents and etc. In addition, she had been written many books about education, youth and life. The focus topic of her book is about youth. Through writing myriad books, she can explain and give many information to peer or people that she never meets.

R M Randy Baskoro

Jakarta Timur, Jakarta, Indonesia

Desired program: MPP (Master of Public Policy)

"R.M. Randy Baskoro is a passionate internal auditor at the Ministry of Finance with a Bachelor's degree in Accounting from Perbanas Institute in 2021 and a Bachelor of Management from Open University in 2022. He holds a Delf B1 certificate, indicating his proficiency in French.

He has received several awards, including the Unqualified Financial Statement Award from the Ministry of Finance for ten consecutive years in 2021, the Best Staff in Inspectorate VI in 2020, and the Best Bureaucratic Transformation Ambassador in 2023.

His expectation for the GRASP mini intensive course is to gain valuable insight and guidance on how to navigate the graduate school application process. Specifically, they hope to learn strategies for crafting a compelling personal statement, identifying and researching potential graduate programs, and networking with professionals in their field of interest."

Ramadhan Sanyoto Sugiharso Widodo
Surabaya, East Java, Indonesia

Desired program: MEng in Biomedical Engineering

Ramadhan Sanyoto Sugiharso Widodo is a young, ambitious student currently pursuing a Fast-Track Program for both Bachelor's and Master's Degrees in Computer and Electrical Engineering at Sepuluh Nopember Institute of Technology (ITS). With a keen interest in engineering, he has already made waves as a laboratory assistant at ITS B401 Multimedia Computing Laboratory. But Ramadhan's interests don't stop there, he has a strong passion for professional development and organizational excellence. He is currently applying for the USINDO GRASP Batch 6 Mini Intensive Course to further enhance his skills and knowledge. Ramadhan values honesty, integrity, and collaboration, and is committed to lifelong learning and being part of a global community of innovative thinkers. He has a unique perspective, allowing him to approach problems from multiple angles, and he is eager to take his skills to the next level by studying abroad, particularly in the United States.

Reza Maliki Akbar
Surabaya, East Java, Indonesia

Desired program: MS in Mechanical Engineering

Maliki is a passionate engineer with hands-on experience in mechatronics, automation, and robotics. He graduated from ITS in Engineering Physics and SMKN 1 Cimahi in Software Engineering, where he founded and led a STEM organization. His experience includes working as an engineer at Terma A/S in Denmark and leading the Banyubramanta ITS underwater and amphibious robotics team. Maliki's practical engineering skills were further honed at Polman Bandung in Manufacturing Automation and Mechatronics Engineering. He is now pursuing a master's degree in Mechanical Engineering at MIT and believes the USINDO GRASP course will help him achieve his goals. With a strong foundation in leadership and engineering, Maliki is eager to apply his knowledge and skills to solve complex engineering problems.

Rhobithotus Mufidah

Mojokerto, Jawa Timur, Indonesia

Desired program: MS in Sustainable Water Management

Rhobithotus Mufidah is a Youth with perseverance who is proficient at managing activities in detail and finding solutions to ensure activities proceed successfully and on schedule. You may address her as Tutus. She is a citizen of Mojokerto Regency, which is a part of East Java, Indonesia. Currently, She is a final semester student at Brawijaya University in the Faculty of Fisheries and Marine Science in terms of the Aquatic Resource Management study program. She is one of the numerous village children who will have the opportunity to continue their education in the United States and return to Indonesia to rebuild a village. With the knowledge she has acquired, she intends to rebuild her own village with international-level experiences and skills. She sincerely believes that the opportunity to participate in the USINDO GRASP Batch 6 Mini-Intensive Course will help her realize her dream.

Ridho Bakti

Pontianak, Kalimantan Barat, Indonesia

Desired program: MBA, Msc in Business Analytic

"Ridho graduated from School of Business and Management Institut Teknologi Bandung with a major in Finance and currently works at BPJS Kesehatan, the Social Health Insurance program in Indonesia. Ridho believes that joining this program will allow him to develop critical thinking skills and enhance his digital literacy, which will be essential for his future career. The program's focus on preparing students for graduate school applications is particularly appealing to Ridho, as He hopes to pursue a master degree in the near future.

Furthermore, Ridho is eager to connect with the amazing peers and mentors who will be participating in the program. Ridho hopes to develop new skills, learn from others, and build a strong network through this program as networking with professionals from various backgrounds will give him a unique perspective on the industry and provide valuable insights into potential career paths."

Roprop Latiefatul Millah
Bandung, Jawa Barat, Indonesia

Desired program: MA in Education

Roprop Latiefatul Millah is a final year student in the Department of Physics Education, Faculty of Tarbiyah and Teacher Training, UIN Sunan Gunung Djati Bandung. Roprop has a particular interest in education, learning technology and conducts research in teaching and learning and the development of research technology. Several research results have been successfully included in scientific competitions and international conferences, several scientific publications, and other forms of dissemination. Roprop is also active in the Program on Salman Activist Scholarships and several activities at YPM Salman ITB. The USINDO GRASP program is in line with the background of educational studies. It can also be a milestone in preparing for a master of Education studies, especially with 21st-century skills, including critical thinking skills and Digital Literacy. In the future, Roprop hopes to become a problem solver for educational problems and can improve the quality of education in Indonesia

Sharon Claudia Rambu Podu Diah, S.I.Kom, MA
Kupang, East Nusa Tenggara, Indonesia

Desired program: Ph.D in Communication

Sharon Claudia Rambu Podu Diah is a fresh graduate with a Master's in Communication Science from Gadjah Mada University. Sharon is an LPDP awardee for pursuing Master's study in 2019 and for Doctoral study in 2022. She plans to study Ph.D. in Communication at Texas A&M University. Sharon is eager to join The USINDO GRASP Batch 6 Mini Intensive Course as it provides courses that could prepare her for applying to Graduate School.

Srihajeng Ayu Rachmadiary
Bekasi, Jawa Barat, Indonesia

Desired program: MBA or Masters in Finance

Ajeng is currently working in Central Bank of Indonesia as an assistant manager. She holds a bachelor degree in Industrial Engineering from ITB . She wants to pursue masters degree in MBA or Masters in Finance in US. She is really excited to join this course to know deeply about the process of applying to US universities and enrich my knowledge in critical thinking.

Sudianto
Pematang Siantar, Sumatera Utara, Indonesia

Desired program: M.Ed. in Teaching and Curriculum

"Sudianto actively writes Indonesian articles in addition to teaching English and managing the curriculum at SMA Kristen Kalam Kudus. He has even published an academic journal.

During his journey as a writer, he discovered that writing is an essential skill to students and many professionals nowadays. This is a necessary skill to cultivate critical thinking and one that is required when applying for scholarships. Ironically, most schools do not adequately and fundamentally teach it. Both teachers and students still view it as a time-consuming task. Moreover, most teachers are not naturally born-writers and yet don't want to write one so absolutely they cannot show the proper ways to write logically and systematically.

In this course, he is looking forward to more perspectives and learning opportunities regarding how to conduct trustworthy research, write logically, and systematically exercise critical thinking."

Syifa Az-Zahra

Cimahi, Jawa Barat, Indonesia

Desired program: MS in public health

Trained as a student in public health practitioner, specifically health promotion, Syifa has participated in some research on various issues of public health with her lecturers. Tobacco control is actually one of the research areas that introduced her to public health policy. She relates to the statement that outside the classroom is where most learning experiences take place. Through trial and error, she learned the importance of multidisciplinary study outside public health. She believes civic engagement is a crucial aspect of promoting health and wellbeing in society. Through this program, she hopes to learn more about effective strategies for community engagement and advocacy, which will enable her to work more effectively with community members to promote healthy behaviors and lifestyle and engaging with diverse communities and building effective partnerships.

**Tietoja Akbar Baroroh**

Surabaya, East Java, Indonesia

Desired program: MBA & MPP

Tieto is in his final year of a Bachelor of Business Administration at the UOP in Pasadena, California. Tieto spent his freshman year at UTM's Faculty of Built Environment, Surveying, and Earth Science to study Geoinformatics. As a result, Tieto has a diverse multidisciplinary background in business, as well as a great interest in sustainability and global business.

Tieto had been working in the intersection between corporate startups and global NGOs across 3 continents such as the DCVMN Switzerland, GREEN Hospitality Hong Kong, and Goodera San Fransisco, USA. Eventually, he has goals to establish a medical tourism startup and an NGO in Bahasa Indonesia for foreign speakers as he analyzed it hasn't fully saturated yet.

However, Tieto hopes through USINDO GRASP he has a wider perspective on Digital Literacy and mature Critical Thinking skills. Additionally, he can build a support system to share his peculiar experiences and get feedback from the USINDO participants and mentors.

Titto Naufal Airlangga

Jakarta Selatan, DKI Jakarta, Indonesia

Desired program: MBA

"While studying economics in Universitas Gadjah Mada, Titto has always fascinated by the force of technology shaping the new landscape of the financial industry. That's why he's keen on solving customer's problems, designing viable business strategies, and finding the right technology as an enabler.

Back in his Uni days, he won an international hackathon competition in Singapore held by F10, a Fintech incubator and accelerator based on Zurich, Switzerland.

Titto have been graduated as a banking management associate, and now as a Big Data Business Analyst, Titto is helping OCBC NISP efforts to integrate and gain value from data to deliver better decision making and seamless digital experience for customer. Aside from the industry he enjoys art and culture very much, he loves great music and writing.

Uswatul Chaira

Banda Aceh, Aceh, Indonesia

Desired program: MA in Education of Psychology

Uswatul Chaira is currently working as freelance teacher, she held a bachelor's degree in English Education from Muhammadiyah Aceh University. She has a great passion in teaching. She also has 8 years teaching experience which started from 2015. Thinking about continuing her degree in the U.S has been such a big dream for decades because the country has a very good education system and all needed facilities. Moreover, the country is a melting pot. Many people from all over the world go there for many reasons. Obviously, this will be a privilege for her to get and learn a lot about the other cultures, languages, and also people. Thus, she is really interested in joining the course from the beginning she saw the information on her social media. She has a big hope that she can learn a lot about how to write a good essay, sharpen the critical thinking skill and acknowledge better about digital literacy plus make a good network with the other participants.

Widhy Roviantika
Tuban, Jawa Timur, Indonesia

Desired program: MBA

A half mother and half engineer. Widhy Roviantika is currently working in Oil and Gas Refinery and Petrochemical Plant in Tuban, Indonesia. She held Bachelor's degree in Chemical Engineering from Sepuluh Nopember Institute of Technology. Experiencing more than a decade in supply chain and her passion on business development make she aspires to pursue Master of Business Administrative in the USA. Besides, it will step up in widen her work's impact to others in her neighbourhood in small industrial city. Juggling between motherhood, working, and preparing MBA application at the same time seems impossible that's why she cannot wait for following this course because it is just like one of entrance to succeed the application.

Willy Sucipto
Kefamenanu, Nusa Tenggara Timur, Indonesia

Desired program: PhD Electrical Engineering (IoT and Machine Learning)

Willy Sucipto is currently working at University of Timor as a Lecturer. He took his bachelor and master degree in electrical engineering at Udayana University Bali.

He interests in technology, especially Internet of Things and Machine Learning. He expects to learn a lot about academic writing from the tutor at USINDO or his USINDO partner.

Wira Anindyaguna

Jakarta, DKI Jakarta, Indonesia

Desired program: MBA

As a Business Strategic Manager at Xdana and committee member of PAPERDO, Wira Anindyaguna possesses a Bachelor's degree in Business Administration from Parahyangan Catholic University. He has a keen interest in the capital market, economy, politics and is also a movie enthusiast. What particularly intrigues him about this program is the opportunity to enhance his skills and strategies for successful school applications, network with individuals from diverse backgrounds, and gain practical experience in a graduate-level classroom setting in the U.S. Wira is thrilled to be part of the USINDO program and eagerly looks forward to the unique learning opportunities it offers.
